PUBLIC PROTOCOL STATE

Inspect an on-chain assertion

Assertion IDs are not enumerable from Aleo mappings. Enter a known ID to load its public terms, participants, and aggregate vote totals.

Assertion ID

2026100301

Load assertion

No on-chain assertion was found for 2026100301field.

Five actual mapping reads found no assertion at fresh ID 2026100301. Existing QA assertions were not overwritten.

Dark Optimistic Oracle webapp Aleo call log

Generated: 2026-10-03T05:47:57.699Z.

> Generated automatically from the browser audit journal. Private Aleo record plaintext is redacted before persistence.

1. Read the latest Aleo Testnet block height

****What happened:**** The frontend requested: Read the latest Aleo Testnet block height. The parameters below identify the exact public provider call.

- Time: 2026-10-03T05:28:22.021Z

The browser audit export contains human-readable operation explanations plus normalized JSON with the initiating demo step. The downloaded journal was imported into repository LOG.md.
